

FlushMount1000

Commercial Air Purification System

The FlushMount1000 goes where others can't! A versatile performer for special applications, the FlushMount1000 needs only 13" of vertical clearance and is perfect of solid ceilings with limited depth. The front accessible panel allows for easy filter maintenance. Available in 22" width for 24" on-center joists installation.

- Same high performance technology as our best-selling FlushMount1000D
- Designed for flushmount installation in solid ceilings
- Easily install with limited ceiling clearance

**Replacement product for the Flushmount 22*

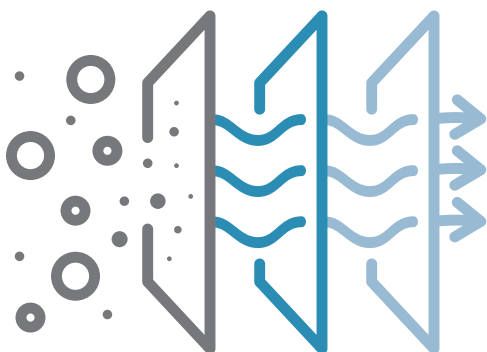

Dimensions	Electrical	Weight	CFM	Finish	Installation	Speeds

TRIPLE FILTERING SYSTEM

Clean, safe, quiet.

Removes smoke, dust, mold spores, dust mites, viruses, pollen, chemicals, odors and more.

MatrixAir's three-phase approach to indoor air filtration may represent the ultimate in purification technology—environmentally safe, maintenance friendly, highly effective and in terms of design, simple in the extreme. The three-phase filter is at the heart of every MatrixAir system. A safe, flexible and highly effective approach to cleaner indoor air.

Phase 1 — Polyester Pre-filter

First line of defense. This filter removes larger particles such as lint, hair, dust and pollen.

Phase 2 — Activated Carbon Filter

The 'chemical' filter. This filter eliminates gases and odors by trapping and absorbing their molecules.

Phase 3 — HEPA Filter

Removes micro-particles such as smoke, dust mites, spores, mold, spray paint, ashes, even most viruses!
