

## MaxMount800

### Commercial Air Purification System

For unobtrusive ducted installation, the MaxMount800 is designed to provide air filtration to an entire home or office. These units can be installed almost anywhere – above a ceiling, below a floor, crawl space or even a mechanical room! Powerful airflow coupled with our exclusive Triple Filtering System means quiet, safe contaminant removal.

- Designed for “whole-house” environments with hydronic/radiant heating
- Quiet, efficient multi-stage HEPA/Carbon filtration
- Fully insulated for maximum performance
- Flexible installation

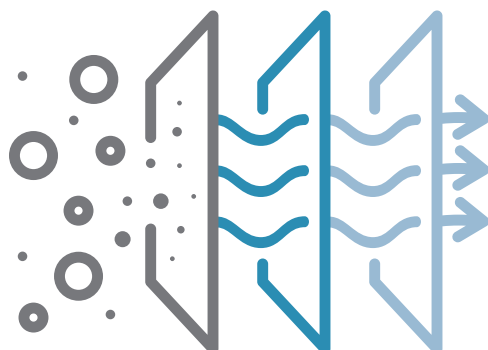

Dimensions	Electrical	Weight	CFM	Finish	Installation	Speeds
35.375"l x 25.5"w x 17.625"h	1/4 hp, 4.2 A, 120 volts, 8 ft. power cord, 3 prong grounded plug	125 lbs.	850 CFM	18 gauge steel	Field supplied duct work	Dual speed

### TRIPLE FILTERING SYSTEM

Clean, safe, quiet.

Removes smoke, dust, mold spores, dust mites, viruses, pollen, chemicals, odors and more.

MatrixAir’s three-phase approach to indoor air filtration may represent the ultimate in purification technology—environmentally safe, maintenance friendly, highly effective and in terms of design, simple in the extreme. The three-phase filter is at the heart of every MatrixAir system. A safe, flexible and highly effective approach to cleaner indoor air.

#### Phase 1 — Polyester Pre-filter

First line of defense. This filter removes larger particles such as lint, hair, dust and pollen.

#### Phase 2 — Activated Carbon Filter

The ‘chemical’ filter. This filter eliminates gases and odors by trapping and absorbing their molecules.

#### Phase 3 — HEPA Filter

Removes micro-particles such as smoke, dust mites, spores, mold, spray paint, ashes, even most viruses!
